

We are delighted to introduce the Taggisar In Case of Emergency Sticker to our members. These simple stickers provide peace of mind whether you ride alone or as part of a group.

How do they work?

Each sticker has a unique QR code which points to a unique URL. Simply scan the sticker or enter the URL in your web browser, enter your emergency information (emergency contact details, medical conditions, medication, allergies – as much or as little information as you like) and then attach it to your riding helmet or anything else you carry with you all the time.

Whenever an emergency incident occurs, time is often of the essence. The emergency services recognise the ICE symbol and can scan the QR code and gain access to this important information within seconds.

You control the information you make available and you can amend it online whenever you choose. Once purchased, the stickers are free to update for life.

How can I purchase some?

Taggisar ICE stickers are available in packs of 5 or 2 unique stickers which can be registered individually or easily linked.

Order yours by visiting www.taggisar.co.uk and don't forget to quote **BRC20** for your 20% discount! In addition, for every 2 pack purchased, the lovely folks at Taggisar donate £0.50 back to British Riding Clubs and for every 5 pack, they donate £1.00. These returned funds will be used to give more opportunities back to you, our BRC members.
